

## תרופות שעלולות להאריך מרווח QT

קשר מוכח	
Class	Medications
Antiarrhythmic drugs	Class 1A: Quinidine, Procainamide, Disopyramide Class 1C: Flecainide, Propafenone Class 3: Amiodarone, Sotalol
Antibiotics	Macrolide antibiotics: Azithromycin, Erythromycin, Clarithromycin
Antimalarial	Chloroquine
Promotility	Cisapride
Psychotropic drugs	Antipsychotics: Chlorpromazine
	SSRIs: Citalopram

קשר אפשרי	
Class	Drugs
Antiarrhythmic drugs	Dronedarone
Antibiotics	Fluoroquinolones: Ciprofloxacin, Levofloxacin, Moxifloxacin, Ofloxacin
Gastrointestinal drugs	Antiemetics: Granisetron, Ondansetron
Alpha1-blocker	Alfuzosin
Dopaminergic Agonist	Amantadine
Azole antifungals	Fluconazole, Itraconazole, Ketoconazole (systemic), Voriconazole
Opioids	Buprenorphine, Methadone
Psychotropic drugs	SSRIs: Escitalopram, Fluoxetine, Sertraline, Paroxetine
	TCA: Amitriptyline, Clomipramine, Desipramine, Imipramine.
	Tetracyclic antidepressants: Mirtazapine
	Trazodone
	Typical Antipsychotics: Fluphenazine, Haloperidol, Thioridazine. Atypical Antipsychotics: Clozapine, Olanzapine, Paliperidone, Quetiapine, Risperidone, Ziprasidone. Lithium
Anticholinergic drugs	Solifenacin, Tolterodine
Promotility	Domperidone

התרופות המופיעות ברשימה הנ"ל, הן רק תרופות הרשומות בישראל ושהינן בשימוש נפוץ.
